LCD-101	75x75/100x100	27" MAX	15kg (33lbs) RATED

ISSUED: MAY. 2013

NOTE: Read the entire instruction manual before you start installation and assembly.

⚠ WARNING

- Do not begin the installation until you have read and understood the instructions and warnings contained in this installation sheet. If you have any question regarding any of the instructions or warnings, please contact your local distributor.
- This mounting bracket was designed to be installed and utilised ONLY as specified in this manual. Improper installation of this product may cause damage or serious injury.
- This product should only be installed by someone with good mechanical ability who has basic building experience and fully understands this manual.
- Make sure that the supporting surface will safely support the combined weight of the equipment and all attached hardware and components.
- If mounting to wood wall studs, make sure that mounting screws are anchored into the center of the studs. The use of a stud finder is highly recommended.
- Always use an assistant or mechanical lifting equipment to safely lift and position the equipment.
- Tighten screws firmly, but do not over tighten. Over tightening can cause damage to the items, This greatly reduces their holding power.
- This product is intended for indoor use only. Using this product outdoors could lead to product failure and personal injury.

Component Checklist

IMPORTANT: Ensure that you have received all parts according to the component checklist prior to installation. If any parts are missing or faulty, telephone your local distributor for a replacement.

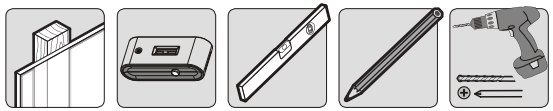
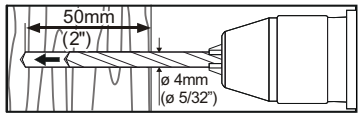
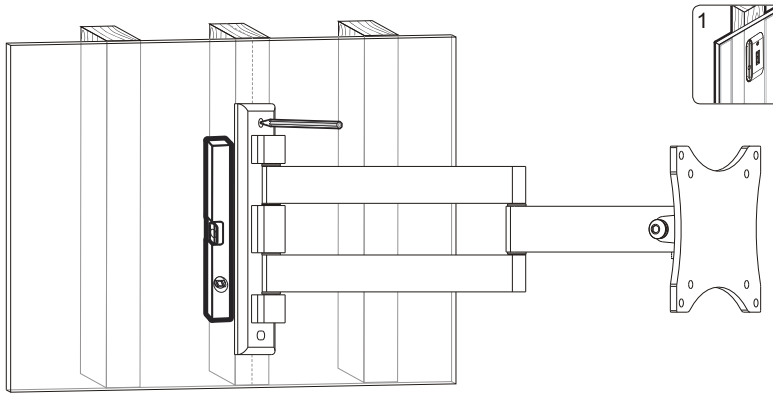
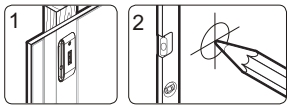
1a. Wood Stud Wall Mounting

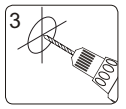




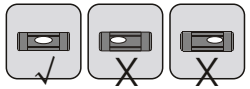


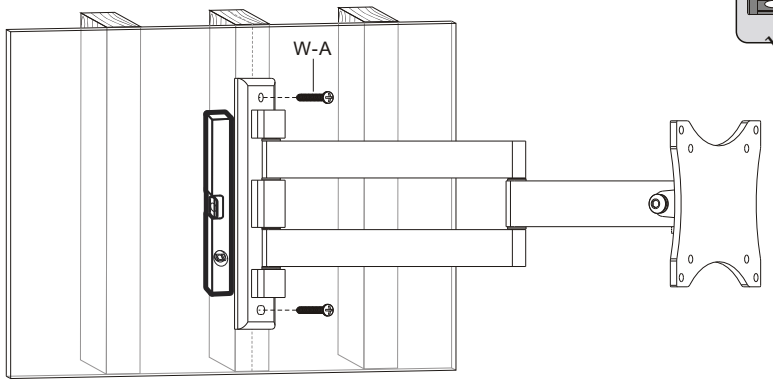


Find and mark the exact location of mounting holes



Drill pilot holes



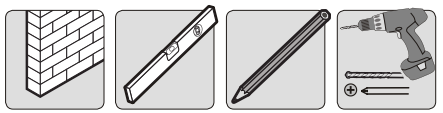


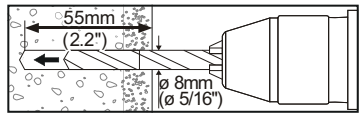
Screw the wall mount onto the wall

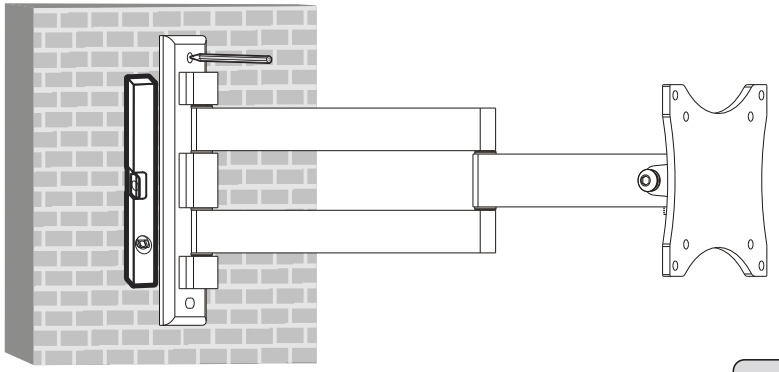
⚠ WARNING

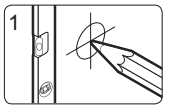
- Make sure that mounting screws are anchored into the center of the studs. The use of a stud finder is highly recommended.
- Installers are responsible to provide hardware for other types of mounting situations.
- Installers must verify that the supporting surface will safely support the combined weight of the equipment and all attached hardware and components.

1b. Solid Brick and Concrete Mounting

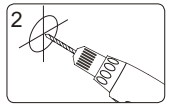




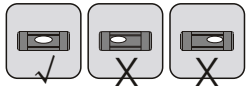


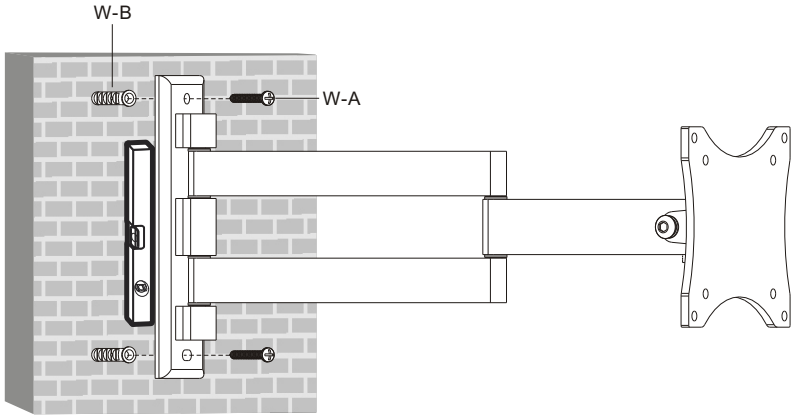


Mark the exact location of mounting holes



Drill pilot holes



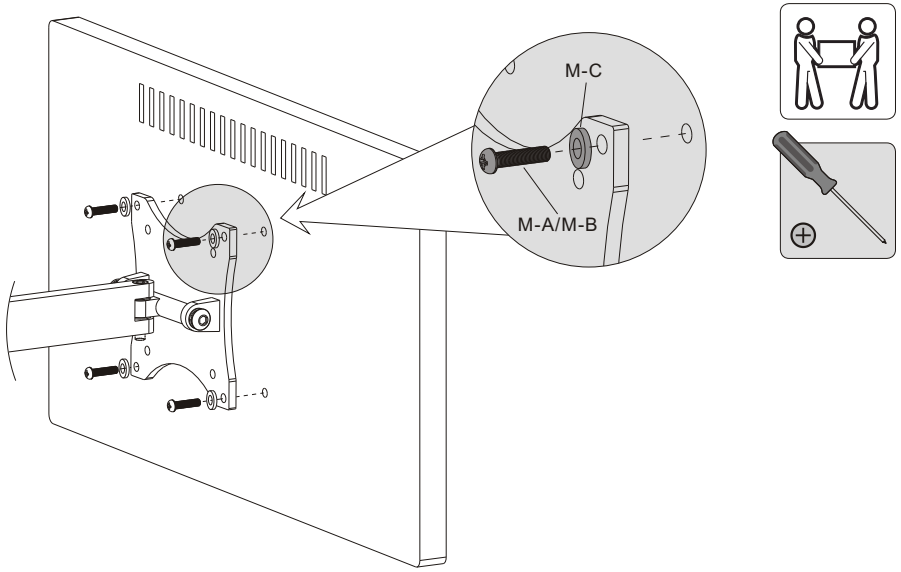


Screw the wall mount onto the wall

⚠ WARNING

Installers must verify that the supporting surface will safely support the combined weight of the equipment and all attached hardware and components.

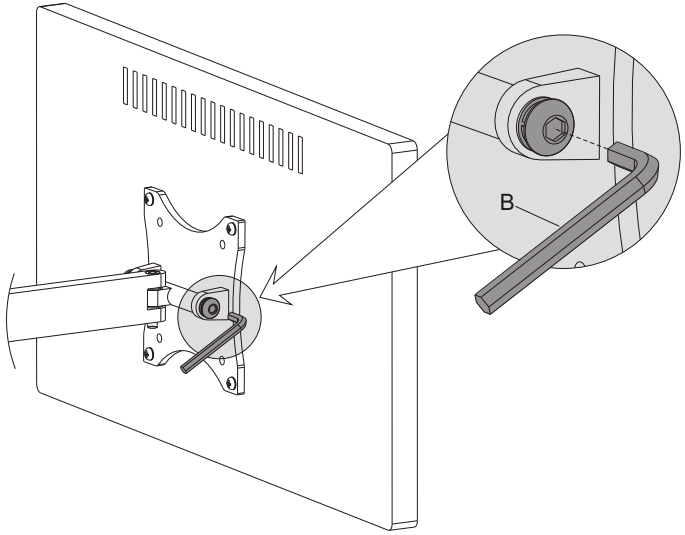
2. Attach the Display to the VESA Plate



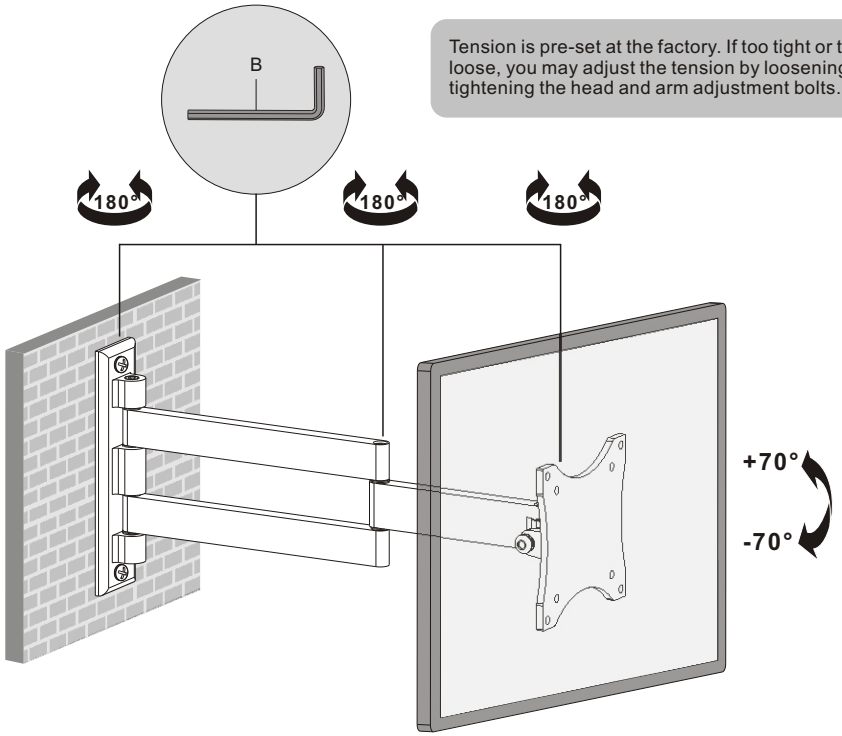
Lift the display and match the holes on your display with the holes on the mount. Secure your display to the mount by tightening screws.

⚠ **Tighten all screws but do not over tighten.**

3. Adjustment



Tighten the adjustment screw by using an Allen Key provided to fix the tilting angle.



Tension is pre-set at the factory. If too tight or too loose, you may adjust the tension by loosening or tightening the head and arm adjustment bolts.

Adjust to the desired location or tilt.

Maintenance

- Check that the bracket is secure and safe to use at regular intervals(at least every three months).
- Please contact your dealer if you have any questions.
